

JULIE DUBOIS

Data-driven Customer Experience & Front-end Specialist

Ath, Belgium | hello@juliedubois.be | +32 497 60 52 53

As a Data-driven Customer Experience & Front-end Specialist, I bridge analytics and implementation to create exceptional digital experiences. I transform user behavior data into actionable insights, then bring these insights to life through scalable, accessible front-end solutions. By combining data analysis, experimentation and modern web technologies, I consistently enhance conversion rates and customer satisfaction. My hands-on scope includes technical web analytics engineering (custom JavaScript tracking, data layer design, advanced SQL analysis, consent integrations), as well as building responsive interfaces with React, HTML/CSS and accessibility-first development. This dual expertise allows me to both identify opportunities through data and implement solutions directly through code.

TECHNICAL KNOWLEDGE

Analytics, Data & Tracking

- Adobe Analytics & Adobe Launch
- Google Analytics (GA4), Google Tag Manager
- Contentsquare, Matomo
- Looker Studio (dashboards & reporting)
- Tagging plans, data governance, data quality
- Cross-platform tracking (web & mobile)
- Customer journey analysis & performance measurement
- Custom JavaScript tracking for non-standard interactions (dynamic components, conditional paths, multi-step funnels) in GTM & Adobe Launch
- Data layer engineering: design, implementation, and ongoing maintenance (specs, versioning, QA) with development teams
- Technical consent integrations (CMP) ensuring compliant data collection and measurement behavior by consent state
- PII sanitation before data leaves the browser (scripts/tag manager filters) to prevent transmission to analytics platforms

Data & Analysis

- SQL for data validation and analysis
- Advanced SQL for analytics: subqueries, window functions, join strategies and hit-level analysis
- Data reconciliation between analytics and backend sources
- Dashboarding & data visualization
- Funnel and journey analysis
- Experimentation analysis

Front-End & Web Technologies

- HTML, CSS / SASS / SCSS, JavaScript
- ReactJS, GraphQL, Twig, jQuery
- Frameworks & libraries: Zurb Foundation, Bootstrap, Bulma, GatsbyJS, Astro
- Styled Components
- Responsive, scalable and accessibility-focused development (WAI / WCAG)
- Strong understanding of component-based architecture and reusable design systems

Back-End, Data & Programming

- PHP, MySQL, Razor
- Python, R (data analysis & scripting)

- APIs, data structures, integrations between product, analytics and marketing environments

CMS & Digital Platforms

- WordPress, Magento, Shopify, CraftCMS
- Drupal, Prestashop
- Magnolia, TeamSite
- Content migration & CMS optimization
- SEO continuity, performance optimization and large-scale content governance

SEO, CRO & Digital Performance

- Technical SEO, on-page SEO, content optimization
- Conversion Rate Optimization (CRO) & A/B testing
- Keyword research & competitive analysis (Search Console, SEMrush, WooRank)
- Paid media fundamentals (Google Ads)
- SEO & performance embedded into design and development decisions

Data Science

- R, Python
- Data analysis, ggplot, data visualization
- Machine learning fundamentals

Design & Creative

- Adobe Creative Suite, Figma, Sketch
- Photography, Video editing
- Illustration, 3D modeling
- Projection Mapping, Veejaying

Automation, Workflow & Tools

- n8n (workflow automation)
- Git, SVN
- Jira, Scrum, Agile
- node/npm
- Comfortable working at the intersection of automation, design, analytics and experimentation

FUNCTIONAL KNOWLEDGE

Customer Experience & CRO

- Customer journey mapping and end-to-end UX analysis
- Quantitative & qualitative analysis of user behavior
- Conversion Rate Optimization (CRO) and experimentation
- A/B testing, hypothesis definition and result interpretation
- Continuous performance optimization and improvement cycles

Experimentation & CRO Leadership

- Definition of experimentation roadmaps
- Hypothesis creation and prioritization
- Test design and statistical interpretation
- Evangelization of CRO mindset within teams
- Collaboration with UX and product teams

Digital Marketing & Growth

- Performance-driven digital marketing strategies
- Content strategy, optimization and distribution
- Synergy between SEO, paid media and analytics

- Data-informed growth initiatives across acquisition and retention funnels

Business & Functional Analysis

- Business requirements gathering and clarification
- Gap analysis and solution design
- Translation of business and marketing needs into technical and analytics requirements
- Data-driven recommendations supporting strategic decision-making
- Governance and GDPR alignment across analytics implementations (close collaboration with Legal/Security)

Project & Stakeholder Management

- Agile & Scrum methodologies
- Planning, coordination and delivery of cross-functional initiatives
- Stakeholder management across business, marketing and IT teams
- Reporting, alignment and communication at operational and management levels

Testing & Optimization

- Functional testing and analytics QA
- Performance monitoring and validation of digital features
- Iterative optimization based on data insights
- Test design, implementation validation and statistical interpretation

INDUSTRIES

- E-commerce & Retail
- Banking & Financial Services
- Media & Digital Platforms
- Telecommunications
- Consumer Services
- Energy

LANGUAGES

- French - Native
- English - Professional (C1)
- Dutch - Intermediate (B1, actively improving)
- Swedish – Basic
- Spanish - Basic

PROFESSIONAL EXPERIENCE

CBTW | 2023-01 - Present

Digital Marketer & Analytics Specialist

Brussels, Belgium | Digital Transformation / Consulting | CBTW internal

Hybrid role supporting multiple European clients at the intersection of analytics, digital marketing, SEO, CRO and front-end development, with a strong focus on data-driven decision-making and business impact. Acted as the bridge between business needs and technical implementation, owning the measurement and reporting layer for multiple client missions.

Key Responsibilities

- Collect, analyze and interpret data related to user behavior, website performance and digital marketing activities.
- Translate analytics insights into actionable strategic recommendations for marketing, product and UX teams.

- Define and maintain tagging plans, analytics documentation and governance for new or evolving digital features.
- Build and maintain dashboards (Looker Studio, Adobe Analytics) to monitor performance and support operational and management decision-making.
- Analyze market trends, audience behavior and competitor strategies to inform digital and content strategies.
- Develop and execute SEO-friendly content strategies (blogs, newsletters, social media and other digital channels).
- Create comprehensive digital marketing plans aligned with business objectives.
- Collaborate closely with developers, designers, marketers and stakeholders in agile, cross-functional environments.
- Define measurement strategies, KPIs and reporting structures for marketing and product teams.
- Hands-on implementation and validation of tracking using GTM & Adobe Launch, including custom JavaScript events where standard triggers were insufficient.
- Design and maintain data layers and tagging plans with engineering teams.
- Perform advanced SQL analyses (subqueries, window functions) to validate hit-level data and connect multiple sources.
- Implement consent logic in tracking (CMP integration) and enforce PII sanitation via tag manager scripts/configurations.
- End-to-end ownership on selected missions (e.g., BCGE, BNP): tracking architecture, data layer, GTM/Adobe Launch configuration, QA/validation, developer enablement, governance & GDPR compliance.

Key Achievements & Impact

- Managed multiple digital marketing and analytics projects for clients across Europe.
- Improved visibility, engagement and conversion through data-driven digital strategies.
- Increased analytics reliability and adoption by aligning tracking implementation with business and product needs.
- Acted as a bridge between technical teams and marketing stakeholders, accelerating delivery and alignment across projects.

Tech: Matomo, Google Suite (Analytics, Tag Manager, Looker, Ads), Meta Business

Stanley/Stella | 2023-04 - Present

Design System & Content Migration Lead

Brussels, Belgium | Fashion / E-commerce | CBTW mission

Led the migration of a large content ecosystem from a legacy platform to Magento, while designing a scalable and future-proof design system. Worked in a complex digital ecosystem where measurement, data quality and performance tracking were key to supporting product and business decisions.

Key Responsibilities

- Define and oversee the end-to-end content migration strategy, including data mapping, segmentation and validation.
- Ensure SEO continuity, analytics tracking consistency and data integrity throughout the migration.
- Design and govern a centralized design system including UI components, accessibility standards and usage guidelines.
- Embed analytics, SEO and accessibility considerations directly into design and front-end decisions.
- Coordinate content, development, IT and business teams to ensure smooth execution.
- Collaborate closely with developers, UX and business teams to ensure tracking requirements were aligned with the new architecture and content structure.
- Support measurement and data consistency considerations during migration to ensure analytics continuity and reliable reporting post-launch.
- Coordinate analytics validation with tag managers to maintain continuity of KPIs after content migration.

Key Achievements & Impact

- Delivered a seamless platform migration with minimal SEO and performance impact.

- Built a reusable design system serving as a foundation for multiple websites and event landing pages.
- Reduced maintenance costs and accelerated time-to-market through standardized components and patterns.

Tech: Magento, Tailwind CSS, Storyblok, Adobe Creative Suite, Piwik PRO, Figma, Astro, Piwik PRO

BNP Paribas Fortis | 2023-01 - 2023-06

Analytics Tech Lead / CRO Specialist

Brussels, Belgium | Banking & Financial Services | Team: 10 | CBTW mission

Led the technical aspects of analytics initiatives, oversaw the implementation of analytics tools and ensured data accuracy and integrity. Owned the measurement strategy and experimentation layer across multiple digital platforms (web & mobile) in a complex banking ecosystem.

Key Responsibilities

- Lead the implementation of Adobe Launch, Adobe Analytics and Contentsquare across websites and applications.
- Design and maintain cross-platform tracking strategies for a unified customer journey view.
- Provide technical guidance to developers on tracking best practices and implementation.
- Perform advanced QA and testing using Perfecto to simulate mobile environments.
- Ensure data accuracy, consistency and compliance.
- Define tracking strategies, tagging plans and KPIs to support decision-making.
- Support CRO/experimentation (hypotheses, test setup, analysis, recommendations).
- Collaborate with developers, product owners and UX to align implementation with business needs.
- Author custom JavaScript in Adobe Launch to capture complex interactions (dynamic UI components, conditional journeys).
- Extend and maintain the data layer with engineering teams to support multi-app analytics and cross-domain journeys.
- Execute SQL-based validations of hit-level data and reconcile datasets across sources for investigations.
- Coordinate technical consent behaviors and ensure PII controls (blocking/transforming data pre-collection).

Key Achievements & Impact

- Delivered cross-platform analytics tracking, enabling holistic customer journey analysis.
- Increased confidence in analytics data across product, marketing and business teams.
- Strengthened analytics maturity within development workflows.
- Designed and implemented tracking architecture including data layer structures and custom JavaScript tracking.
- Ensured GDPR-compliant tracking and PII filtering in a banking environment.
- Led cross-team alignment between developers, product owners and analysts on measurement strategy.

Tech: Adobe Launch, Adobe Analytics, Contentsquare, Perfecto

BNP Paribas Fortis | 2021-11 - 2023-02

Digital Analyst

Brussels, Belgium | Banking & Financial Services | Team: 10 | CBTW mission (via Positive Thinking Company)

Collected, analyzed, and interpreted data related to online user behavior, website performance and digital marketing; delivered insights and recommendations to improve strategies and experiences. Worked extensively on measurement frameworks, experimentation and performance analysis to make data actionable for teams.

Key Responsibilities

- Collect, analyze and interpret quantitative, qualitative and usability data.
- Define tagging plans and analytics requirements for new features and releases.
- Deliver insights and recommendations to product, UX and marketing teams.
- Support continuous optimization initiatives across digital channels.
- Process and visualize data for strategic decision-making.
- Design and maintain dashboards and reporting to monitor performance and conversion.
- Collaborate across UX, developers and marketing to identify friction points and optimize journeys.
- Define and iterate the data layer to support new features and channels.
- Operationalize GDPR principles in analytics workflows (consent gates, data minimization, PII removal).

Key Achievements & Impact

- Embedded analytics tagging as a mandatory step in QA and release processes.
- Significantly improved data quality, simplifying reporting and analysis.
- Raised awareness and adoption of analytics best practices among developers.
- Defined measurement frameworks and KPI tracking across digital journeys.
- Built tagging plans and ensured proper data layer implementation.
- Performed advanced behavioral analysis using Contentsquare (journey analysis, friction detection, session replay analysis).
- Successfully transitioned from a developer role to a marketing/analytics role.

Tech: Adobe Launch, Adobe Analytics, Contentsquare, Perfecto

MediaMarkt | 2020-12 - 2021-11

Webmaster · CRO & Customer Journey Expert

Zelev, Belgium | E-commerce / Retail | Team: 15 | CBTW mission (via Positive Thinking Company)

Specialized in understanding and optimizing the entire customer path. Analyzed touchpoints, behaviors and pain points to improve experience, satisfaction and conversion/retention in a large-scale e-commerce ecosystem.

Key Responsibilities

- Analyze customer journeys across key entry points (homepage, category, landing pages).
- Lead A/B testing and CRO initiatives to improve conversion and UX.
- Support front-end teams with technical guidance and reusable components.
- Manage CMS and product catalog structures.
- Improve SEO performance and monitor competitor positioning.
- Work together with business and IT teams (bridge between the two, with focus on Business).
- Define CRO hypotheses and experimentation plans.
- Work with Optimizely and testing tools.
- Identify funnel leaks and UX frictions through behavioral data.
- Implement and validate custom JavaScript events via GTM to capture complex funnels and micro-interactions beyond standard triggers.

Key Achievements & Impact

- Increased conversion through data-driven UX and CRO improvements.
- Enabled faster international feature rollouts via reusable front-end solutions.
- Strengthened collaboration between business, IT and UX teams.
- Learned to improvise creative solutions in a locked working environment.

Tech: HTML/CSS, JavaScript, Fact-finder, Elastic Search, Google Tag Manager, Google Analytics, Google Optimise, TeamSite CMS, Optimizely

Proximus | 2018-01 - 2020-11

Front-End Developer (PICKX Platform & Proximus.be)

Brussels, Belgium | Telecommunications | Team: 20-40 | CBTW mission (via Positive Thinking Company)

Worked on high-traffic, content-heavy platforms with strong UX, accessibility and scalability constraints. As Front-end Developer, responsible for designing and implementing the visual elements and user interface of the website and web application using HTML, CSS, and JavaScript to create responsive, user-friendly interfaces across various devices and browsers.

Key Responsibilities

- Develop reusable front-end templates and components for dynamic, data-driven pages.
- Maintain and evolve a shared HTML/CSS component library (design system).
- Ensure accessibility compliance (WAI standards).
- Contribute to complex e-commerce order flows with flexible front-end logic.
- Create and update templates and elements of the Pickx web application to be reusable in every context.
- Update the website library with new designs and structural components (e.g., header supporting 10 versions).
- Recreate dynamic order flows adapting to each client variant based on UX and technical criteria.

Key Achievements & Impact

- Reduced development and maintenance effort through shared component libraries.
- Improved consistency and accessibility across multiple platforms.
- Successfully delivered features across multiple teams and parallel projects.
- Learned a new workflow with development servers only accessible by SSH and extensive use of Git.

Tech: HTML, SASS, Foundation 5, Bootstrap, JavaScript, Razor, PHP, Twig, Magnolia CMS, Git, Scrum, Jira

Engie | 2016-12 - 2018-01

Front-End Developer · Project Manager

Brussels, Belgium | Energy | Team: 20 | CBTW mission (via Positive Thinking Company)

As a front-end developer at Engie, designed and maintained digital interfaces such as websites and email templates. Optimized content management systems and conducted technical analyses for web applications. As project manager, coordinated and executed digital projects including implementing Google Analytics and managing timelines. Drove innovation through initiatives like the Engie blog and creative concept development using Engie Box and smart objects.

Key Responsibilities

- Participate in the creation of the new website and rebranding of Engie.
- Maintain and update the various Engie websites.
- Create and maintain templates for e-mailing.
- Create reusable macros in the TeamSite CMS (Freemarker 'FTL') to help content editors.
- Technical analysis and testing of solutions developed for new web applications.
- Create innovative concept using the Engie box with smart objects (watch, Sonos, Philips Hue) for personalized atmospheres.
- Project management of the new Engie blog (WordPress) and implementation of Google Analytics.
- Coordinate timelines, stakeholders and deliverables.

- Participate in innovation projects (IoT concepts, chatbot PoC).

Key Achievements & Impact

- Played a pivotal role within the team, providing technical assistance to teammates when needed.
- Developed a proof of concept for a chatbot, which was successfully implemented and now assists customers by directing them to the appropriate FAQ page or contact.
- Played a key role in major digital transformation initiatives.
- Delivered innovative proof-of-concepts adopted by the business.
- Strengthened collaboration between technical and non-technical teams.
- Improved front-end skills and learned basic IoT manipulation.

Tech: WordPress, TeamSite, Freemaker (FTL), Salesforce.com, Innovation Development, Agile Methodologies, Android Development, Git, Node.js, Jira, Google Analytics, SASS, CSS, JavaScript, Adobe Creative Suite
